Subject: Revised EE/CA risk assessmnet for Master Metals

EPA Region 5 Records Ctr.

200863

Jeff

I have reviewed the revised risk assessment and the derivization of the Risk Based Remediation Goal for lead for the Master Metals site, presented in the revised Engineering Evaluation and Cost Analysis (EE/CA), dated November 23, 1998.

The methodology, assumptions, discussion , and the tables and graphs presented in Appendix A are all acceptable and support a reasonable cleanup level for the site.

I have no further comments on this submission by Entact.
